To whom it may concern;

This letter is to recognize the hard work and professionalism that Wells Construction had towards our project. Our dream was to build a state-of-the-art veterinary and canine rehabilitation center complete with a 6000sqft outdoor space. Our vision came from three stubborn women who knew nothing of construction but were determined to make our dreams come true.

Wells Construction was chosen out of three well-known construction companies in the area. Our decision to go with Wells Construction was based on the kindness and understanding they displayed during the interview process. They never once made a promise they couldn't deliver, were always up-front with cost and stayed true to a time schedule to produce the project on time. Their communication skills were spot on and we always felt in-the-know as things developed.

We would highly recommend Wells Construction to anyone looking for a company who prides themselves in a job well-done! We are so glad we choose Wells Construction and our beautiful building is nothing short of amazing!

Sincerely,

Suan Chew, Landlord
